Skills

Technical skills

- ☐ Python, Bash
- ☐ Linux, Git
- ☐ Docker, Docker Compose, Kubernetes, Helm
- ☐ DB: SQLite, MySQL, PostgreSQL, Redis
- ☐ Cloud: DigitalOcean
- ☐ GitLab CI/CD
- ☐ Grafana, Prometheus, EFK
- ☐ Ansible, Terraform
- ☐ Protocols: DNS, SSH, SSL/TLS, HTTP/HTTPS, DHCP

Languages

- ☐ English: fluent speaker, Upper-Intermediate level

Education

- ☐ BSc in Computer Science at Belarusian State University, Faculty of Applied Mathematics and Computer Science. Graduated in 2022.

Summary

- ☐ DevOps engineer seeking Junior/Intern positions with focus on cloud infrastructure and automation.

Projects

- ☐ **Krainet (github/krainet)**
 - Developed CI/CD pipelines for the project written in Go.
 - Set up DigitalOcean infrastructure for the project with Ansible and Terraform.

Experience

- ☐ **DevOps Intern, Up4soft (github/up4soft-internship)**
October 2025 — December 2025
 - Developed Docker Compose configuration; wrote CI/CD pipeline for building and publishing images to the registry.
 - Built Ansible playbooks and Bash scripts to automate deployments on DigitalOcean.
 - Configured monitoring with Prometheus and Grafana, and EFK for logging.
 - Deployed the application to a Kubernetes cluster using Helm charts.
 - Stack: Java, JavaScript, Nginx, PostgreSQL, Redis.
- ☐ **Assistant (part-time), Belarusian State University**
September 2023 — January 2026
 - Taught Programming Technologies. Supervised the development of a full-fledged distributed application through 8 Scrum sprints, acting as Product Owner, Scrum Master, and Code Reviewer.
 - Taught Computer Networks and Computer Architecture. Responsibilities included evaluating student labs, conducting Q&A sessions.
- ☐ **IT Support Technician, Belarusian State University**
August 2022 — January 2026
 - Installed, configured, and updated applications to support the learning process.
 - Administered user accounts and shared folders.
 - Managed Active Directory: created and maintained groups, users, and GPOs.
 - Configured DHCP server.
- ☐ **ABAP/4 Developer (part-time), IBA (mdait.by)**
December 2021 — January 2023
 - Built PDF forms for Veon company documents and filled them with SAP S/4HANA database data.
 - Enhanced standard Materials Management screens via user exits and BAdIs.
 - Participated in building OData service and SAP Fiori app using JavaScript.
